

A decorative blue line starts with a small circle at the top left, goes down vertically, then diagonally down and to the right, then horizontally to the right, then diagonally down and to the left, ending in a small circle. A larger blue circle is at the end of the diagonal line, with a small blue circle to its right and a small blue circle below it connected by a thin line.

be smart about electricity use.
saving electricity
helps reduce emissions.

Save electricity by turning off unnecessary lights. Replace incandescent bulbs with more efficient fluorescent lamps. Turn off TVs, computers and other equipment when not in use.
