

Finished Lubricants

REACH pre-registration status and registration plans

Date issued: November 2010

ExxonMobil has been actively working with its direct Suppliers to ensure that all eligible substances contained in ExxonMobil **Finished Lubricants** that are currently sold by ExxonMobil within the EU are pre-registered and will be timely registered by ExxonMobil or its upstream Suppliers.

Some of these substances are manufactured by ExxonMobil, but most are sourced from third-party suppliers. Substances will be registered, depending on their nature and tonnage, in 2010, 2013 or 2018 at the latest. Because the majority of ExxonMobil Finished Lubricants are a mixture of substances with individual registration deadlines, there is no single registration date that can be given for a single product.

We are able to confirm that ExxonMobil does not expect to discontinue any Finished Lubricant supplies to our EU Customers in the short term as a result of the REACH registration. However, should there be any changes in our supply plans, we will inform our Customers at the earliest possible opportunity.

Please note ExxonMobil does not provide an Only Representative service for this range of products.

If you have any questions please address them to your usual ExxonMobil Contact, or alternatively you may contact us at reach@exxonmobil.com

Note

ExxonMobil will not be liable for any damages resulting from the use of or reliance on this information.
