

## Fuel guide

# ExxonMobil Avgas

North America

### About our fuels

ExxonMobil is an industry-leading manufacturer and marketer of aviation fuels and lubricants. ExxonMobil Avgas fuel is designed for piston engine-powered aircraft. It meets the requirements of ASTM D910, standard specification for aviation gasoline and DEF STAN 91-90.

### Quick fact

In 1903, ExxonMobil's heritage companies provided the fuel and lubricants for the Wright Brothers' first flight.

### Supply reliability and product integrity

The Baton Rouge and Edmonton refineries produce Avgas with a distribution reach that gives customers across North and South America and the Caribbean the flexibility to receive Avgas by rail, truck or barge.

Our integrated global refining and supply organization manages our manufacturing and distribution facilities, giving our customers access to one of the most robust supply chains in the industry — with reliable, on-time delivery of high-quality aviation fuels. We ensure long-term supply integrity by investing in our supply chain, and we strictly adhere to rigorous industry product handling and quality control requirements.

The LBC rail terminal in Sunshine, Louisiana, is on the Canadian National rail line/St. Gabriel station. The Imperial Oil Edmonton terminal can serve points on both the Canadian National Railway and Canadian Pacific Railway.
