

Mobil Delvac MX™ 15W-40

High performance diesel engine oil

Outstanding performance across all engines

Mobil Delvac MX™ 15W-40 is a high performance mineral engine oil capable of extending the life of marine engines that operate in severe conditions. It is recommended for use in modern marine high-speed diesel engines, including those from manufacturers including Caterpillar, Cummins, Volvo, Daihatsu and Yanmar.

Its advanced chemistry provides outstanding performance across all types of engines and is suitable for modern, demanding low-emission diesel engines.

Engine cleanliness

Outstanding thermal and oxidation stability helps to reduce low temperature sludge build-up and high temperature deposits. This offers marine operators the potential to achieve:

- Enhanced engine and key component cleanliness
- Maximised component life
- Extended intervals between oil and filter changes

Improved energy consumption

Mobil Delvac MX 15W-40's high performance viscosity index (VI) offers excellent soot handling, which can lead to improved viscosity control as well as used oil pumpability. It can also potentially reduce energy consumption and increase system responsiveness.

Longer service life

Mobil Delvac MX 15W-40 is engineered to improve equipment reliability, helping maximise component life while lowering operational and maintenance costs.

This includes:

- Excellent low temperature properties that provide exceptional start-up wear protection
- Component compatibility that leads to long gasket and seal life as well as extended service intervals
- A TBN reserves that helps neutralise acid and stay-in-grade shear stability that protects components against wear
- Advanced detergency and dispersancy abilities, which help promote longer component life
