

# Mobilgrease XHP™ 220 Series

Premium greases for a variety of marine applications

Energy lives here™

## Product features

Mobilgrease XHP™ 220 Series greases provide outstanding equipment protection to help enhance relubrication intervals and unleash productivity.

- Excellent protection and durability help optimise reliability in a wide variety of heavy-duty applications
- An excellent choice for extreme conditions, including high temperatures, contaminated environments, heavy loading and extended relubrication intervals
- Recognised around the world for innovation and outstanding technical performance

Mobilgrease XHP Series greases possess excellent properties to better resist water washout.

## Potential benefits

Mobilgrease XHP Series greases help provide:

- 1 Excellent endurance and leakage control for long intervals and low costs
- 2 Exceptional wear protection in extreme conditions
- 3 Superb protection against water wash out, rust and corrosion

## Grease overview

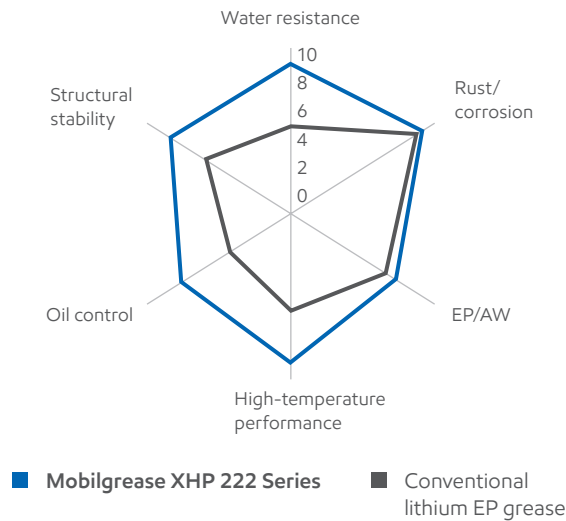

Mobilgrease XHP Series greases offer unique advantages when compared to conventional greases. They possess excellent adhesion and cohesion properties to better resist water washout and ingress, while their blue colour allows operators to quickly check for full coverage and protection. The greases are formulated for superb mechanical stability of the thickener system and exceptional protection against rust, corrosion and wear.

Recommended applications	
Winch and windlass	✓
All deck grease applications	✓
Electrical motor bearings	✓
General grease applications	✓

# Mobilgrease XHP™ 220 Series

## Balanced formulation

Mobilgrease XHP™ 220 Series greases perform on multiple dimensions to meet the demands of bearings in a variety of applications. They are characterised by excellent water resistance and load-carrying properties, and help provide long-term protection against rust and corrosion. Mobilgrease XHP 220 Series greases show significantly higher performance when compared with our conventional greases based on lithium technology.
